

2022 revision support for learners: National 5 Applications of Mathematics

Guidance for the 2022 exam

We **will not** assess you on the following topics in the 2022 National 5 Applications of Mathematics exam:

- ◆ scale drawing
- ◆ planning a navigation route
- ◆ line of best fit
- ◆ investigating the impact of interest rates on savings and borrowing
- ◆ constructing, interpreting, and comparing scattergraphs and pie charts
- ◆ calculating mode and range
- ◆ investigating gradient using coordinates
- ◆ extracting and interpreting data from compound bar charts, pictograms, stem and leaf diagrams, scatter diagrams, or a map
- ◆ making or justifying decisions based on patterns, trends, or relationships in data
- ◆ understanding the effects of bias and sample size

You should use this information to help you plan your revision and prepare for the exam.

Remember to look out for *Your Exams*. This guide contains essential information and rules that you need to know about SQA exams.
