

NPA Computer Games Development

Details of Course Components

This course be comprised of three topics; Design, Media Assets and Development. Within the course, pupils will be introduced to the genres, trends and emerging technologies of the computer games industry. This course will provide a foundation of techniques that are sought after in the industry such as digital design, creation of media assets, development and testing.

Throughout the course pupils will be given the opportunity to learn about the computer games industry and the developmental cycle of a video game. By the end of this course, the pupils will have produced a computer game using the skills they have developed and could be awarded the NPA Computer Game Development qualification from the SQA at level 4 or 5.

Progression: Following on from this course you will be able to study NPA Computer Games Development at a higher level and National 4 Computing Science.

S1	Digital Literacy	Computing
